

Team on-Boarding

One new team member can make or break a team

When an existing team welcomes a new member to the team, the first phase of integration can be very challenging for the team as well as the new team member. This could even result in a phase of uncertainty in a team and in some teams tension can easily develop.

Shadowmatch consultants are capable to facilitate a Team-on-Boarding session of three hours to ensure a smooth and much more efficient on-boarding phase for new team members.

The Process

- All team members to do the Shadowmatch worksheet.
- A facilitated session to be booked with a Shadowmatch Consultant.
- All team members to attend this facilitated session.

Additional Notes

Team members will be introduced to their Shadowmatch Portal where they can individually request Relationship Reports with their fellow team members.
