

## **Network Global Logistics Partners with PeopleSync to Help Drive Success in Finding the Right People**

*Network Global Logistics is one of PeopleSync's latest success stories. The Shadowmatch technology has helped NGL assemble the most impressive talent in the air courier and logistics businesses. NGL has shown across the board improvement in team building, employee development, employee retention and time to recruit*

Dallas, Texas ([PRWEB](#)) February 10, 2012 -- One of the latest PeopleSync success stories is [Network Global Logistics](#). Shadowmatch has helped NGL assemble the most impressive talent in the air courier and logistics businesses. Though the company has only been using [Shadowmatch](#) since 2011, NGL has shown across the board improvement in [team building](#), employee development, employee retention and time to [recruit](#).

“While the best and brightest tend to gravitate toward industry leaders and innovators like NGL, we can’t take all the credit,” said Scott Riddle, NGL President and Chief Operating Officer. “One of the keys to our success is the amazing ability of PeopleSync to help us hire and groom the best people. Shadowmatch helps us determine what makes our [top performers](#) successful, and then match candidates to our environment, culture and performance benchmarks.”

Using Shadowmatch, NGL has been able to enhance the company’s overall performance, and the performance of its individual employees, while reducing hiring costs and retaining valued employees.

“Shadowmatch is so easy to use,” said Maureen Schilling, Senior HR Business Partner. “And I love that the results are instant. Being able to email the candidate, have them take the assessment, and get everything emailed out to the manager before lunch is priceless.”

“But what really sets Shadowmatch apart from competitors is the ability to compare candidates against a benchmark of top performers,” said Schilling “This is key. In positions such as sales, customer service and management, there are key indicators that we want to focus on, and Shadowmatch makes that easy and convenient.”

“NGL is one of our greatest examples of a company that ‘gets’ how sophisticated technology and knowledge of people and skill sets can help a company perform optimally,” said Adrian Wood, VP of Business Development for PeopleSync. “When we look at how NGL has out-performed its competition and how it has increased its revenues, we know it’s a validation of our unique services and a testament to a great partnership. When you put the best people into an operation like NGL, the outcome is entirely predictable.”

### **About PeopleSync**

PeopleSync, based in Dallas, Texas, provides the internationally acclaimed Shadowmatch® behavioral benchmarking system to enable strategic services that provide value in team building, employee development, hiring and redeployment by addressing the challenges of contextual fit in the workplace.
